Durable and Safe

WELCOME TO HIS GATES

His Gates is a leading manufacturer and supplier of premium-quality gates, fencing systems, and access solutions for professional use.

From our production facility in Sneek, we design, manufacture, and deliver fully customized solutions that combine strength, reliability, and modern design.

With a strong focus on craftsmanship and innovation, we ensure that every product meets the highest standards of quality and durability. Our gates and fencing systems are widely used in business parks, government facilities, residential properties, and industrial sites. Anywhere security, functionality, and aesthetics go hand in hand.

HIS GATES PRODUCT CATALOGUE

SLIDING GATES

SLIDING GATES

Our sliding gates offer a durable, safe, and efficient access solution for a wide range of applications — from private properties to commercial and industrial sites.

Thanks to our in-house production, the gates are available in various designs, dimensions, and finishes, with the option for prefab delivery to ensure quick and efficient on-site installation. Each construction is designed for intensive use and combines high-quality materials with reliable drive technology.

Whether manually operated or fully automated, our sliding gates represent quality, safety, and long-lasting performance.

- Space-saving design: the gate slides along the boundary line, requiring no swing radius.
- Robust construction: built with premium materials for long-term reliability.
- Automation-ready: suitable for motorization and integration with access control systems.
- Custom-built: available in bespoke heights, widths, and designs.
- Prefab option: delivered pre-assembled for fast installation and minimal on-site assembly time.

HIS GATES PRODUCT CATALOGUE

SWING GATES

SWING GATES

Our double swing gates provide a reliable and representative access solution for a wide range of locations — from commercial premises and logistics complexes to residential projects.

Thanks to our in-house production, the gates are available in various models and dimensions, with options for manual or electric operation. Each gate is built with a robust steel structure and equipped with durable hinge and locking systems, ensuring long-term, intensive use.

With their solid construction and sleek design, our double swing gates combine functionality, safety, and quality into one complete solution.

- Symmetrical gate wings for a wide and balanced opening.
- High-quality steel construction with a premium finish.
- Available with manual or automatic operation.
- Durable hinge and support systems for intensive use.
- Integration-ready for access control systems.
- Available as prefabricated electric version for fast installation.
- Custom-made in size, color, and design.

TURNSTILES

TURNSTILES

Our turnstiles provide controlled and secure pedestrian access to business premises, factories, and other restricted areas. They are designed for intensive, continuous use and offer an efficient solution for access management in professional environments.

With in-house production, we ensure a solid construction, precise finish, and full compatibility with a wide range of access control systems. Turnstiles are available in various models, from waist-high to full-height, depending on the required security level.

Combining reliability, durability, and user-friendliness, our turnstiles deliver a professional access solution with a long service life.

- Designed for intensive, continuous pedestrian flow.
- Robust steel construction with durable protective coating.
- Delivered prefab for quick and easy installation.
- Compatible with multiple access control systems, such as badge, card reader, and biometric systems.
- Seamless integration with existing fencing structures.
- Low-maintenance and weather-resistant design.

HIS GATES PRODUCT CATALOGUE

DESIGN POORTEN

DESIGN POORTEN

The design gates from HIS Gates combine advanced engineering with a distinctive appearance. They offer the same functionality and quality as our standard gates but stand out through their unique design, material selection, and refined finish.

Within our design line, we manufacture custom creations such as Mikado sliding gates, louvered swing gates, and wood-clad sliding gates. Each model is fully designed and produced in-house, ensuring that dimensions, style, and materials perfectly match the client's requirements and the architectural character of the surroundings.

HIS Gates design gates are created for projects where aesthetics and identity are just as important as safety and reliability.

- Available as sliding gate or double swing gate.
- Fully custom-made in design, dimensions, and finish.
- Durable steel construction combined with premium materials.

HIS GATES PRODUCT CATALOGUE

PEDESTRIAN GATES

PEDESTRIAN GATES

Onze looppoorten bieden een veilige en duurzame doorgang voor voetgangers bij bedrijfsterreinen, logistieke complexen en industriële locaties. Ze vormen een essentieel onderdeel van de totale toegangsoptelling en zijn eenvoudig te combineren met hekwerken en poorten.

Dankzij onze eigen productie zijn de looppoorten leverbaar in diverse uitvoeringen, afmetingen en afwerkingen. De constructies zijn ontworpen voor intensief gebruik en kunnen zowel handmatig als elektrisch worden uitgevoerd.

Onze looppoorten staan voor kwaliteit, betrouwbaarheid en een lange levensduur, met een strakke afwerking die past binnen elke professionele omgeving.

- Robuuste staalconstructie met duurzame oppervlaktebehandeling
- Geschikt voor integratie met toegangscontrolesystemen
- Combineerbaar met hekwerken en poorten voor uniforme uitstraling
- Prefab levering voor snelle installatie op locatie
- Bestand tegen intensief dagelijks gebruik, onderhoudsarm en weerbestendig

PREFAB SOLUTIONS

PREFAB SOLUTIONS

Our prefab solutions offer maximum efficiency and reliability in the realization of access systems. All gates, from sliding and double swing gates to pedestrian gates and turnstiles are fully manufactured and electrically pre-assembled in-house. This means each system is completely built, tested, and prepared in our workshop for immediate on-site connection.

This approach allows us to deliver products that not only meet the highest quality standards but also significantly reduce installation time. On-site, the gates only need to be positioned and connected to the power supply, resulting in a dependable, plug-and-play solution that's ready for immediate use.

- Fully pre-wired and tested in our workshop.
- Applicable to all gate types: sliding, double swing, pedestrian gates, and turnstiles.
- Plug-and-play installation: simply position and connect to power.
- Durable constructions with premium finish.
- Designed for intensive and long-term use.

TUBULAR FENCING

TUBULAR FENCING

The tubular fencing from HIS Gates is designed to provide durable and functional perimeter security with a professional and representative appearance. The construction offers a strong, stable, and transparent boundary, suitable for a wide range of industrial and commercial applications.

Thanks to our in-house production, we deliver custom solutions in terms of height, bar spacing, and finish. Each section is made from high-quality steel and finished with a durable galvanized and/or powder-coated layer to ensure a long lifespan.

- Fully customizable in design, height, and bar spacing.
- Robust steel construction with long-lasting coating.
- Compatible with gates, pedestrian gates, and turnstiles.
- Low-maintenance and suitable for intensive use.

ORNAMENTAL FENCING

ORNAMENTAL FENCING

The ornamental fencing from HIS Gates adds character and distinction to any property. It combines security with aesthetics, creating a representative boundary for commercial buildings, professional projects, and other high-profile applications.

All our ornamental fences are fully manufactured in-house, allowing complete customization in design, height, color, and finish. Whether you prefer a classic, decorative style or a sleek, modern look. Each model is crafted from high-quality steel and finished with a durable galvanized and/or powder-coated coating for lasting protection.

By combining visual appeal with functionality, our ornamental fencing provides not only reliable security but also a refined appearance that enhances any professional environment.

- Fully customizable in design, height, color, and finish.
- Robust steel construction with decorative detailing.
- Durable coating for long-term protection and aesthetic appeal.
- Ideal for commercial and project-based applications.
- Easily combined with gates and pedestrian gates for a uniform look.

WORKING WITH HIS GATES

Working with HIS Gates means partnering directly with the manufacturer. We design and produce all our fences and gates entirely in-house at our own factory in Sneek. This allows us to guarantee consistent quality, short lead times, and maximum flexibility in customization and design.

As a supplier of fencing, gates, and access systems, we provide complete perimeter security solutions. From sliding and swing gates to pedestrian gates, turnstiles, and prefab systems.

Our prefab production method ensures efficient and fast on-site installation: position, connect, and ready for immediate use. In this way, we support our partners with reliable, durable, and quickly installable fencing systems that meet the highest standards in the industry.

- Fast delivery times.
- Specialized in custom-made solutions.
- Experienced specialists who think along with you.
- In-house production by skilled professionals.
- Galvanized and coated products for maximum durability.

DELIVERY AND LOGISTICS

At HIS Gates, delivery and logistics stand for speed, precision, and reliability. Thanks to our in-house production, planning, and transport, we ensure that every product arrives on-site at the right time and in perfect condition.

Our prefab systems are delivered fully assembled and ready for installation, allowing installers to get to work immediately. Through close coordination between our factory and logistics department, we guarantee consistent quality, short lead times, and minimal downtime on the construction site.
