- Railways
- Hotels
- Restaurants
- Agricultural businesses

WHAT IS A PEDESTRIAN GATE?

Our pedestrian gate is a solid and reliable gate designed to secure any passageway. Thanks to its open and transparent design, it can be installed in virtually any environment. From a height of 150 cm, the gate is equipped with either a standard pointed spike rail or diagonally cut bars to prevent climbing and enhance security.

Pedestrian gates: The advantages!

A Reliable and Solid Appearance

A pedestrian gate is an excellent choice for a variety of security applications. It serves as an effective physical barrier, preventing unauthorized access while allowing controlled passage for pedestrians.

A Safe Passage

Our pedestrian gates can be customized in various sizes and designs. Each gate is tailor-made to meet specific functional requirements and aesthetic preferences, ensuring both safety and visual harmony within any environment.

Durable Material

Steel is an exceptionally durable material that can withstand a wide range of weather conditions. This makes steel pedestrian gates ideal for long-term use with minimal maintenance.

Long Lifespan

One of the major advantages of steel pedestrian gates is their extended service life. Thanks to the use of solid, high-quality materials, they offer significantly greater durability compared to aluminum gates.

STEEL GATE

Discover the Five Models of Our Elegant and Durable Pedestrian Gates. Smooth in operation and hassle-free, each gate is crafted from premium-quality steel. Not only visually appealing, but also exceptionally strong, low-maintenance, and built to last.

Discover the 5 models

5

In any desired color

Our gates are hot-dip galvanized as standard, in accordance with NEN-EN-ISO 1461, and can be finished with a single- or double-layer powder coating in any RAL color that complements your surroundings.

Standard colors fall under Category 1. Other colors are available on request.

HOW WE PRODUCE OUR SPEEDGATES

Tailored Service

Sales

Our experienced advisors are happy to visit you to find the perfect solution for your site access or perimeter security.

Production

At HIS Gates, our skilled professionals manufacture all products in our own factory in Sneek.

Delivery

After galvanizing and/or coating, the products are delivered directly to your location.

3 Steps to a Custom Speedgate

1 Choose the dimensions, color, and functionality

Measure the exact dimensions of the area where you want to install the gate. Be sure to measure the length and height accurately.

2 Complete it with accessories

Decide which accessories you'd like to use to control access to your premises. Share your preferences, we'll take care of the rest!

3 Get in touch

Contact us, and one of our advisors will visit you free of obligation.
